

## *Sustainable and Energy Policies*

---

Viña Requiringua is a family owned business located in the Requiringua Fundo S/N, Sagrada Familia in the Curicó Valley. The company is dedicated to the art of wine making, a craft that is perfected every day to build a solid foundation of trust, respect, care and appreciation for our clients, suppliers, partners and community. Viña Requiringua is committed to being a sustainable company, one that is environmentally friendly, economically viable and socially responsible.

This commitment includes fostering energy efficiency in our daily activities along with the optimisation of the technology and design of our processes, operations and installations. A key part of this commitment is the integration of energy in our Sustainability Policy, now to be known as our Sustainability and Energy Policy, which is the result of the alignment of company policy and our environmental commitment.

- **Social:** Evaluate, communicate and diminish the risks that could compromise the health and safety of our employees and partners. Create solid links with local authorities and communities as a trustworthy and respectful company.
- **Environment:** Encourage our partners to be more environmentally aware, to care for the flora and fauna (no encuentro definición para itica?) to constantly monitor the environment effects of our company and our surroundings, to strengthen and increase our recycling capacity.
- **Economic:** To promote the communication of the company's operations and social or environmental programmes. To encourage good practices, technical groups and alliances that promote industry growth.
- **Energy:** Ensure the adherence to current legal requirements, acquire energy efficient products, equipment and services. To constantly improve our energy performance

Viña Requiringua is committed to the responsible management of the processes and to the creation of Sustainable Wines. They will provide the necessary information, Human Resources, technological resources and financial resources to achieve their energy objectives and goals.

This policy will be checked regularly and updated whenever necessary.
